

The Monét Pen Kit Assembly

(NOTE: Do NOT use Gatsby Tubes with this kit. There is a slight difference in tube length)

Your Coupler/spacer/Center Band should come pre-assembled, but just in case you take it apart or it comes un-assembled look below for order of pieces

Coupler, Spacer, Decorative Band (Threaded end facing tip)

Line up the finished parts according to the above diagram.

- **Screw the Coupler on the Black Part of Tip**
- **Press one end of completed barrel on to Tip Coupler until it's up to Decorative Band**
- **Slide Clip on to Cap Assembly**
- **Protect Cap Assembly then w/ clip attached Press into other end of completed barrel**
- **Make sure Mechanism is in the retracted position**
- **Slide Cap on to end of Twist Mechanism until it clicks in to place (Do NOT use Press)**
- **Take the top of refill and gently push on inside of Mechanism until it won't push any further. This seats the inside of the Mechanism properly so the refill won't catch incorrectly.**
- **Place Spring on Refill then Slide Refill in through open top of Cap Assembly**
- **Screw Mechanism in to open part of Cap Assembly**

This pen operates by holding the tip and twisting the cap portion in one direction. This is a Single twist kit.

REFILL: Pull off the Cap, unscrew the Mechanism and replace ink. This is our recommendation in order to keep the refill seated correctly.
